a Platinum Stairlift could
improve your lifestyle:

Exclusively Curved

Nothing needs to change

Platinum Stairlifts

In selecting Platinum Stairlifts you have chosen to deal with a company that has many years experience in designing and manufacturing stairlifts for curved staircases.

Our headquarters, located in a modern state-of-the-art factory, on the edge of the Yorkshire Dales, is home to our team of engineers, design centre, customer helpline and training facility. We are proud that our reputation for dedication, commitment, standards and service is widely acknowledged by many as being the benchmark in the industry.

At Platinum we care about your needs and believe that our products and services can make a real difference in making life easier for you to enjoy more independence at home.

Take time to familiarise yourself with the Platinum Curve and find out why Platinum is so often the first choice for curved stairlifts.

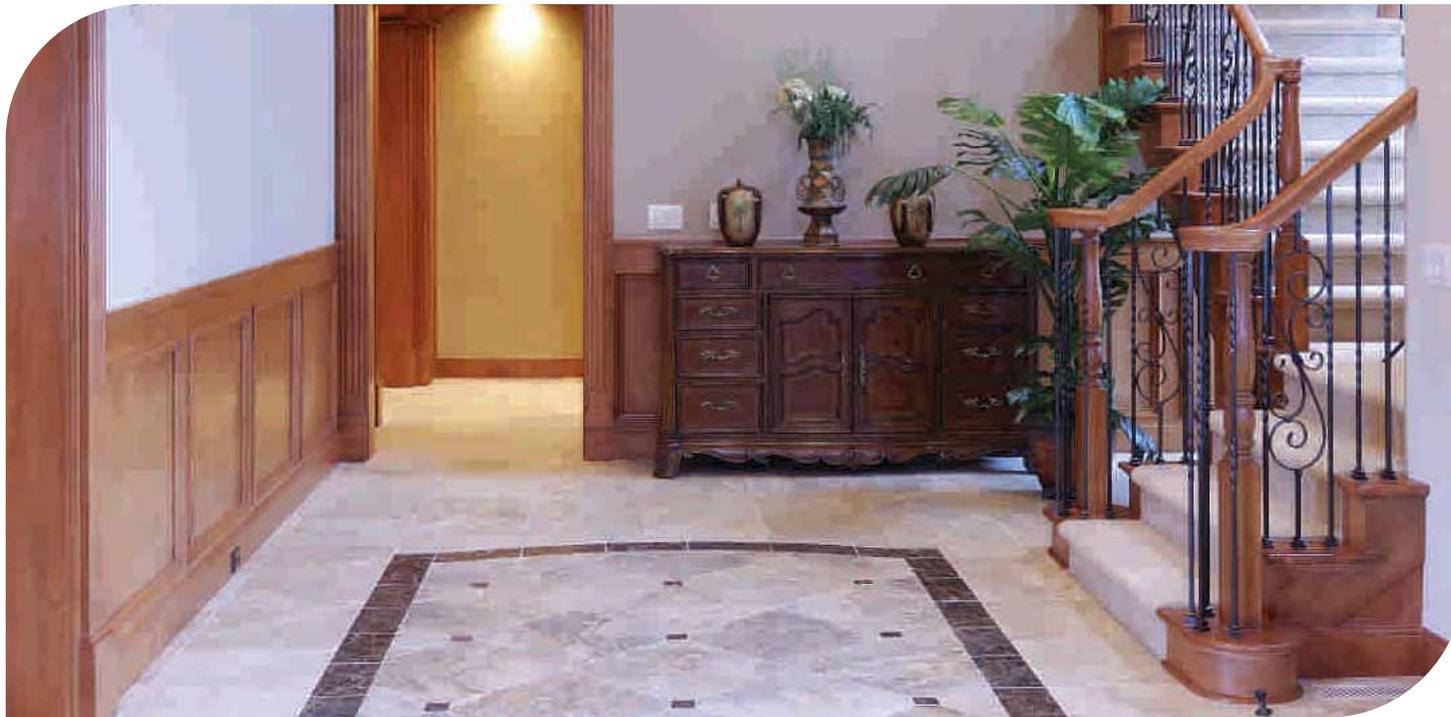

Exclusively Curved

Unlike many other companies that make numerous types of differing lift styles, at Platinum we prefer to concentrate our expertise and resources on one.

We believe that by specialising in the design, manufacture and delivery of the domestic curved stairlift we can provide our customers with a superior product.

That is why if your staircase requires a lift that needs to negotiate landings and corners, you can rest assured that the Platinum Curve was designed and built with you and your home, exclusively, in mind.

Making your house adjust to you

At Platinum we understand that fitting a stairlift is an easy way of regaining full use of your home and can help you to remain happier and more independent within familiar surroundings.

We also appreciate that homes come in many shapes and sizes, this is why the Platinum Curve has been specifically designed to be very versatile and capable of fitting snugly and unobtrusively to almost any staircase. In most cases they are fitted to the stair-treads rather than the wall, so there is no building mess or damage to your décor.

A stairlift is a functioning appliance, but that does not mean it needs to look industrial. The Platinum Curve has been designed as a piece of modern furniture, to blend subtly into your home. Coupled with a gentle operation, making it an attractive addition to any household.

When not in use it can be folded away and with its slim profile will not obstruct the stairway for use by other people.

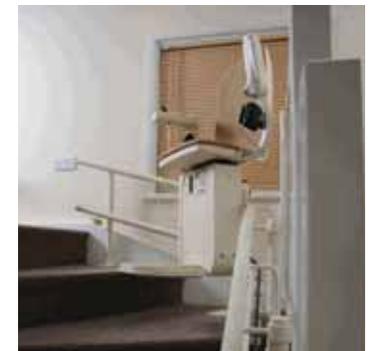

To ensure the right fit, trained advisors will visit your home by appointment. They will consult, survey and assess the most appropriate solution for your specific needs and circumstances.

Comfort and Safety

There are many differing needs and requirements for people wanting a stairlift, but invariably comfort and safety are always two of them.

For your comfort the Platinum Curve incorporates an PDMC motor to ensure a smooth and gentle ride and the twin rail mechanical levelling system provides for a gentler and steadier travel on turns and corners. In addition the seat is ergonomically styled and incorporates plump padding and cushioning.

For safety the lift comes with a retractable, car style, seatbelt as standard and the seat can swivel away making it easier for you getting off at the top of the stairs. The footrest and carriage incorporate a number of pressure sensitive safety edges that stop the lift instantly should it come into contact with any obstructions. The motor has a special inbuilt safety brake that will slow the lift and prevent it from travelling too fast on decent. The unit also comes with a key-switch to prevent unauthorised use by visitors and young children.

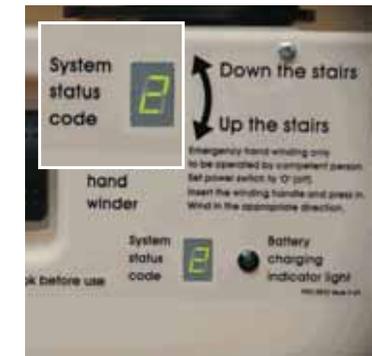

Freedom and Independence

Being in your own home surrounded by your favourite things, family and friends is surely more preferable to a hospital cubicle or care facility. There are also a huge number of therapeutic and social benefits in retaining independence at home.

A stairlift is one solution to keeping and prolonging independence at home along with many other freedoms and benefits.

Climbing steep stairs, for example, can be strenuous and at times quite demanding physically. A stairlift can provide a simple, easy and convenient method of getting up and down stairs quickly and safely.

After all, using a domestic stairlift is not really any different to travelling on escalators in public buildings and shopping centres.

Ease of Use and reliable operation

Our stairlift is designed to make life easier and once fitted becomes an invaluable addition to the home. That is why at Platinum we believe the most important thing our stairlift must be is easy to operate, exceptionally reliable and trouble free.

The easy to use joystick and remote controls ensure the lift is simple to call and run. Each rail is custom build to fit the staircase of your home. To ensure the perfect fit we have invested in precision tooling, jigs and machinery, so that each lift is custom-built to a high standard with fine tolerance levels.

The on-board diagnostic system informs and assists with functions and provides operational and service details. Powerful batteries ensure that even in the event of a mains power failure the stairlift can still operate as normal and the battery management system will only allow the lift to commence a journey if there is sufficient power to complete it.

Powered options

The Motorised Swivel Seat

This feature automatically rotates the seat at the top of the stairs when you are ready to alight and is perfect for anyone who may have difficulty manually swivelling the seat around.

The Automatic Footrest Raiser

Allows the footrest to fold up at the touch of a button, ideal for people who have difficulty bending.

Built in the UK to exceptional standards

We understand how much reliance many of our customers place in our products. That is why we will not compromise on build quality, attention to detail and engineering excellence and only use high quality components and materials.

In addition to exceptional manufacturing excellence, every lift must pass numerous quality inspections and standards, including a full test ride before leaving the factory.

Platinum is proud to be a British company and we hope our customers will support our commitment to retaining our factory and manufacturing base here in the UK.

Environment and sustainability

As a company Platinum Stairlifts not only understands the need to supply our customer's with high quality, reliable and cost effective products, we also appreciate the responsibility we have to the environment, carbon footprints and our obligation to enhance the local economy.

That is why we source most of our materials and components from reputable British suppliers. In addition to offering new products, we have a long established reconditioning business, dedicated to refurbishing and recycling stairlifts across the UK.

By choosing a Platinum stairlift you will not only be taking comfort from receiving an excellent and reliable product, you will be doing your bit to help the environment too.

Delivery & installation

At Platinum we understand only too well that, for a variety of reasons, many of our customers need their stairlifts supplied quickly. That is why we have invested in a modern manufacturing process that can deliver our curved lifts within an industry leading 10 days*

Buy with confidence

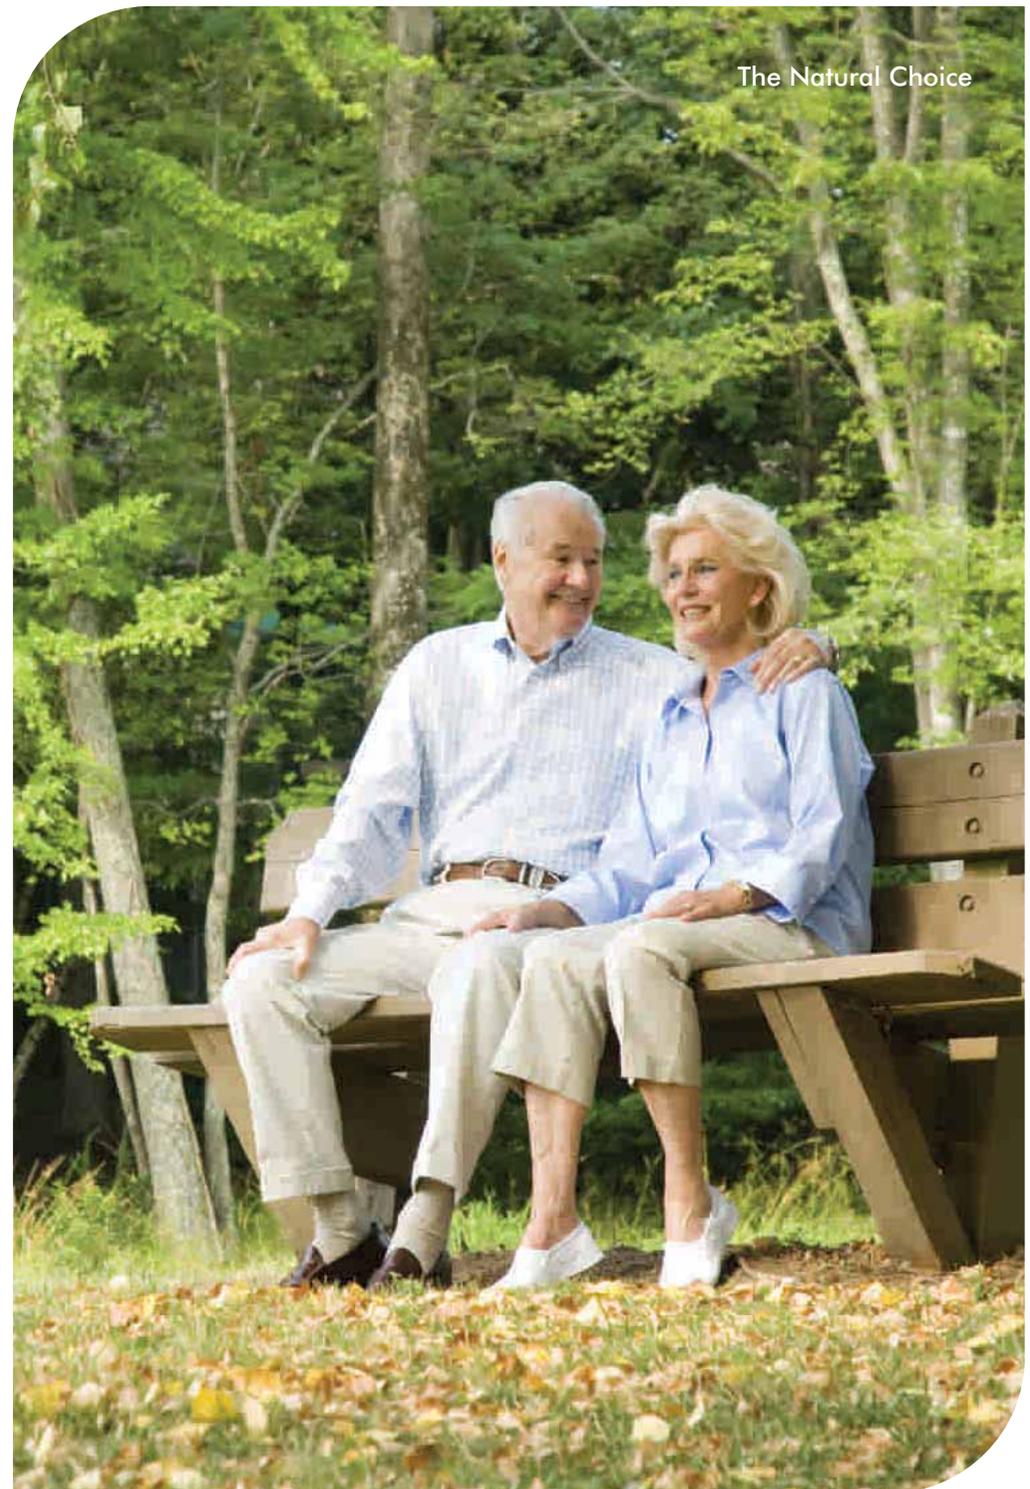

All our stairlifts are guaranteed with a minimum 12 month warranty.

Platinum are active members of the British Healthcare Trades Association (BHTA) an organisation to which membership requires a strict adherence to codes of practice and a commitment to high levels of quality and customer service.

At Platinum all of our customers are special and each order receives the same level of dedication and attention one expects from a first-class company.

The Natural Choice
