MediTek

THE GLOBAL STAIRLIFT COMPANY

Making life easier

Just because we expend more energy doing everyday tasks, as we get older, does not mean we need to limit our ability to enjoy a more contented lifestyle.

From time to time, climbing steep stairs can be awkward and physically demanding for some people.

Designed and built in the UK to the highest standard

Swivel seat for easy lighting

Key switch prevents unauthorised use

Joystick for fingertip control

Emergency holding switch will stop the lift instantly if pressed

Lap belt provides comfort and support

ICS diagnostics provide operational and service information

Pressure sensitive edges stop the lift in the event of an obstacle

Safe, reliable and easy to use

Why take needless risks climbing steep stairs when you can use a stairlift?

A stairlift is an excellent product designed to simply provide an easy and convenient way of accessing upper floors quickly and safely, whenever required.

The E120 MediTek stairlift has been developed specifically for domestic application and will fit unobtrusively and gracefully into your home.

When not in use the E120 stairlift can be folded away and with a slim profile will not obstruct the stairway for use by other people.
